

Issue 2012 November

In the heated pace surrounding our lifestyles, it is becoming more and more difficult to find the necessary reading time that one would need to stay up to his children's expectations of him and of his intellect...one must read about the latest technology, research about the environmental impact of every carbon footprint, analyze the origin of a tsunami and then find ways to explain reasons behind the shifting of the rotational axis of earth as a result of a massive earthquake... all this within a conversation over dinner or
